

XP - Impossible's' Stories on YouTube

Chapter 3 - The car with no mileage limit

In the beginning of the video, Guilherme Benchimol talked about how drastic was the change in his life when he decided to move to Porto Alegre after being fired from his previous job. Also, he mentioned the difficult period of XP initial moments, when he had to deliver flyers, announce the company services from door to door and sell his car because of the lack of the company's money.

Thereafter, XP's founder remarked once again that it all changed when the team decided to create a course teaching people how to invest. After that last attempt, 30 students joined the project and, therefore, the company's revenue slowly began to bring some good numbers. At this moment, they've realized that this car had no mileage limit
